

Robusta RPA Installation Guide

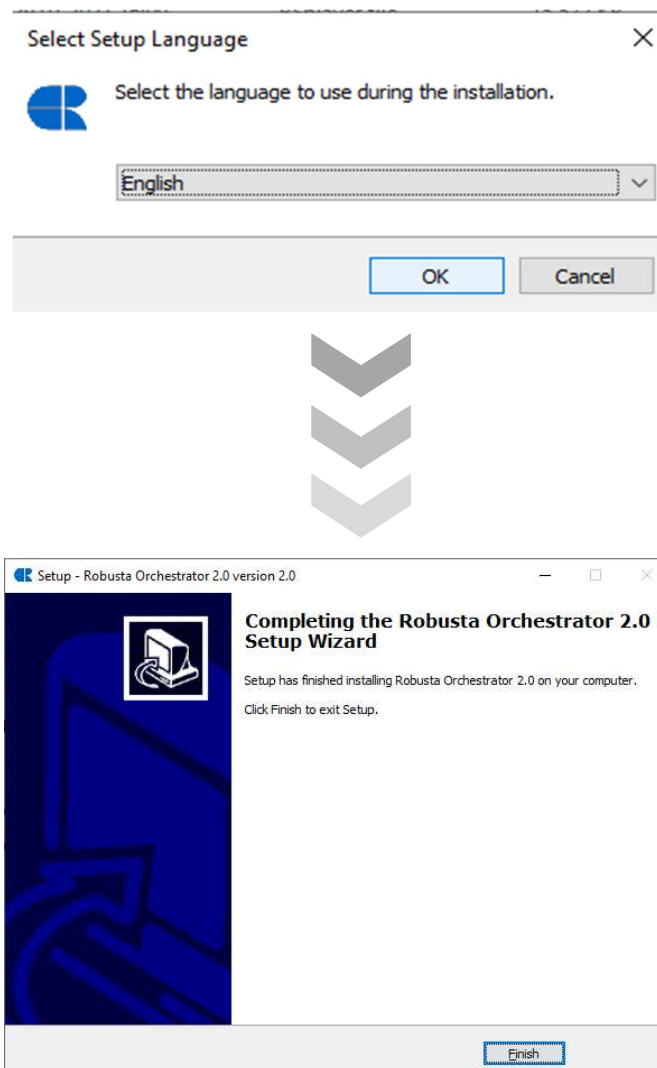

ROBUSTA

COGNITIVE AUTOMATION

Robusta Cognitive Automation
2021

Installing Robusta RPA Orchestrator

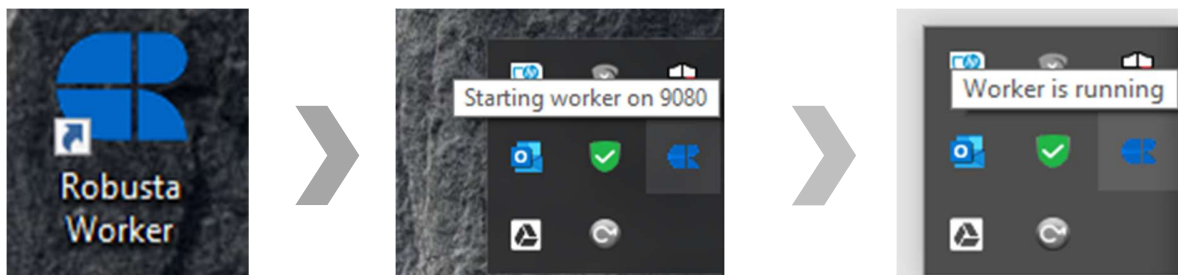

This section covers the creation and installation of robot worker files. It shows step by step in Windows environment.

Please follow the link for detailed information

Starting Robusta RPA Worker

This section was created to ensure that the robot worker is working after the installation is complete.

Please follow the link for detailed information

Connection to Robusta Orchestrator Web Application

After making sure that the robot worker is working, the connection of the orchestra is completed by providing the relevant information. And our robot worker is ready to create a new process and run.

A screenshot of the 'Robusta Orchestrator Login' window. The window has a title bar that says 'Robusta Cognitive Automation'. The main area contains the following fields and buttons:

- Username:** A text box containing 'murtaza.asci'.
- Password:** A text box with masked characters (dots).
- Worker Port Number (i.e. 8080):** A text box containing '8443'.
- Orch Address (i.e. 192.168.1.0:8088):** A text box containing '178.18.207.85:8443'.
- Disconnect:** A blue button.
- Connection Status:** A label next to a box containing the word 'Connected', which is highlighted with a red rectangle.
